

Klaudiusz Pupiec, Front-end developer

I'm Klaudiusz, a Frontend React Developer leading the frontend side of business-critical projects. I specialize in building scalable applications with React and TypeScript, focusing on architecture, reusability, and code quality. I work with Jotai, MobX, and TanStack Table, implementing advanced table logic and backend integrations. I create and maintain reusable npm packages, work with Git, CI/CD, and Azure pipelines, and occasionally support backend tasks in Python. UX/UI is treated as a supporting aspect of development, with collaboration using Figma.

Work experience

Jan 2023 - Present

React Developer

 **AXA IT Solutions** Warsaw, Poland

As a **React Developer**, I work on a business-critical application supporting fund managers in managing investment processes at AXA IT Solutions. I lead the frontend side of the project, being responsible for delivering new features, shaping UI/UX, and translating business requirements into technical solutions while collaborating closely with PMs in France and backend teams in Hong Kong.

My daily work involves **React**, **TypeScript**, **MobX**, **Jotai**, **REST**, **WebSockets**, **Zod**, **SCSS**, **PrimeReact**, **PrimeFlex**, and **TanStack Table** (including custom filters, selectors, and extended table logic). I also develop internal **npm packages** and occasionally support backend tasks in **Python**.

I'm experienced with Azure pipelines, **CI/CD workflows**, and **Figma** for design tasks, working in a highly international environment.

Methodology:

Working in two-week sprints using **Azure DevOps (Boards)**, participating in sprint planning, daily stand-ups, refinements, and retrospectives. Actively contributing to improving team processes and workflow quality.

May 2022 – Dec 2022

Junior Frontend Developer

 **TherVira** Warsaw, Poland

Building fully responsive web applications (RWD) using React and **TypeScript**. I have developed communication between the frontend and backend and utilized **React Router** for efficient client-side routing. Additionally, I have worked with MongoDB to create simple databases based on provided .csv files. I have also created **UX/UI designs** and graphics from scratch to meet application needs. I work comfortably within a tech stack that includes **HTML**, **CSS/SCSS**, **React**, **React Router**, **MongoDB**, **GitLab**, and **Slack**.

Skills

Programming tech

HTML/CSS/SASS,
React,
JavaScript,
TypeScript,
Next.js,
JOTAI,
MobX,
React Router,
RestApi,
WebSockets
CI/CD
Python

UX/UI background

Figma,
prototyping,
Photoshop

Languages

Polish Native
English B2/C1

Educations

2016 - 2020

Wrocław University of Science and Technology, Faculty of Architecture

2020

Polish-Japanese Academy of Information Technology in Warsaw
