

# Klaudiusz Pupiec, Front-end developer & UX/UI designer

Hello! I'm a Frontend React Developer with experience in creating user interfaces and UX/UI. I specialize in working with React, developing new functionalities using libraries such as PrimeReact, MobX, and Jotai – from building visual components to implementing filters, sorting, and processing data from the backend. My architectural background enables me to support the UX/UI team in designing intuitive interfaces. I am proficient in Figma, allowing me to seamlessly switch between developer and designer roles.

## Work experience

Jan 2023 - Present

### React Developer

**AXA IT Solutions** Warsaw, Poland

Focused on developing new features and fixing bugs in applications. I work in an international team and, since March this year, I've been leading my own project with team-lead assist. Additionally, I occasionally support the UX/UI designer by creating new views and features based on the requirements provided by the project owner. We work in Azure with two-week sprints. My tech stack includes **React, TypeScript, JOTAI, PrimeReact/PrimeFlex, Sass, and WebSockets**.

May 2022 – Dec 2022

### Junior Frontend Developer

**TherVira** Warsaw, Poland

Building fully responsive web applications (RWD) using React and **TypeScript**. I have developed communication between the frontend and backend and utilized **React Router** for efficient client-side routing. Additionally, I have worked with MongoDB to create simple databases based on provided .csv files. I have also created **UX/UI designs** and graphics from scratch to meet application needs. I work comfortably within a tech stack that includes **HTML, CSS/SCSS, React, React Router, MongoDB, GitLab, and Slack**.

Sep 2020 – Apr 2022

### Architect

**Atelier3 Girtler & Girtler** Warsaw, Poland

I worked as an architect at a Warsaw-based architectural studio, focusing on multi-family residential buildings. This experience taught me responsibility and precision in handling my assigned tasks.
